

LASER ROLLS

Colour Laser

Description

These rolls for laser copiers present excellent characteristics: good laser aptitude, dimensional stability, no curling after the heated section of the copier, good folding resistance.

The colour application is ideal for printing blown-up photos, posters, copies of paintings, place of sale advertising. The base paper has a very smooth surface and an exceptionally homogenous sheet formation for surprisingly realistic prints. Clairefontaine has put all its' experience into the development of this reference papers, specially dedicated for colour laser printing.

Applications

Wide format laser printing, black & white or colours

Technical specifications

Substance	<i>g/m²</i>	90	120	NF EN ISO 536
