

Banner matt 350 μ

Papiers **Plotters**

Description

Banner matt 350 μ is a tear-proof and flame-retardant PVC fabric, sandwiched between two layers of white vinyl, recommended for VISCOM applications, such as displays, advertisements, banners, or roll-ups. Banner matt 350 μ is compatible with dye or pigmented inks, for water resistant prints. Its matt appearance and 100% opacity allow for brilliant colours. The waterproof nature of this material makes it ideal for medium-term indoor and outdoor applications. It can also be fitted with eyelets and welded.

Applications

Black, White & Colour / Advertising, displays / Banners & roll-ups
