

Valorise Ivory

Rebecca **Studio**

Description

The powerful force of nature in a recycled paper.
Valorise Ivory is an invitation to explore a world of authenticity and ecological commitment. This uncoated paper, partly made from organic material, tells a story of resilience and rebirth, imbued with the riches of nature. Aesthetically pleasing, Valorise Ivory is perfectly suited to book covers in its 350g/m² version, and remains ideally well adapted to publishing projects, invitations, or menus in its lighter versions.

This paper is made from recovered residues. It is manufactured with the utmost care, and great attention is paid to its quality. However, you may occasionally – and more often than with other papers that do not contain residues – notice irregularities such as unbound particles or specks.

Furthermore, you may observe colour variations between different batches of raw materials and during its use over time, both before and after application. These differences are due to the residues used, which are by nature less homogeneous than the raw materials commonly employed in paper manufacturing. These variations should therefore be considered intrinsic properties of these types of papers and are fundamentally linked to the natural look and feel of circular papers

Technical specifications

Substance	gsm	120	240	350	NF EN ISO 536
Thickness	µm	168	335	470	NF EN ISO 534
