

Eversatin Premium White

Rebecca Life

Description

Eversatin Premium White is a premium recycled paper, specially crafted for offset and preprint applications. Made entirely from 100% recovered fibres, it combines environmental responsibility with exceptional print quality.

Its surface features a pronounced satin finish, providing a smooth tactile feel and an elegant visual appearance. Colours appear richer, solid areas more uniform, and text is exceptionally crisp and readable.

Its manufacturing process is firmly eco-friendly, minimising environmental impact through the absence of chlorine bleaching and very low waste production.

Eversatin Premium White is the choice of a high-performance, aesthetically pleasing, and responsible recycled paper, offering a distinctive satin finish for communication materials with strong added value.
